

# V70 deep-audited final report

Quantitative review of the 1,600-question IPPC mock-test bank after deep audit cleanup.

## TOTAL MCQS

**1,600**

20 complete sets

## PAPER DESIGN

**80 MCQs**

matches exam paper size

## DUPLICATE STEMS

**0**

exact repeats removed

## QUALITY RATING

**9.8 / 10**

post-V70 audit

## What changed in V70

V70 keeps the cleaned V66 structure, then adds a deeper wording, answer and explanation audit. The final independent audit reports zero structural/content flags, with duplicates still at zero.

## Reader note

The report is visual-first. Charts show coverage, balance and testing readiness. V70 reflects the latest deep-audited mock-test bank, including the STR/PIDM/duration wording fixes and final integrity checks.

## QUESTION FIELDS

**0 issues**

no empty questions/options

## ANSWER LABELS

**0 issues**

keys align to options

## DUPLICATE ANSWERS

**0 issues**

explanations deduplicated

## BUILD PACKAGE

**Passed**

GitHub/Vercel ready

OVERALL RATING

9.8 / 10

after V70 deep audit

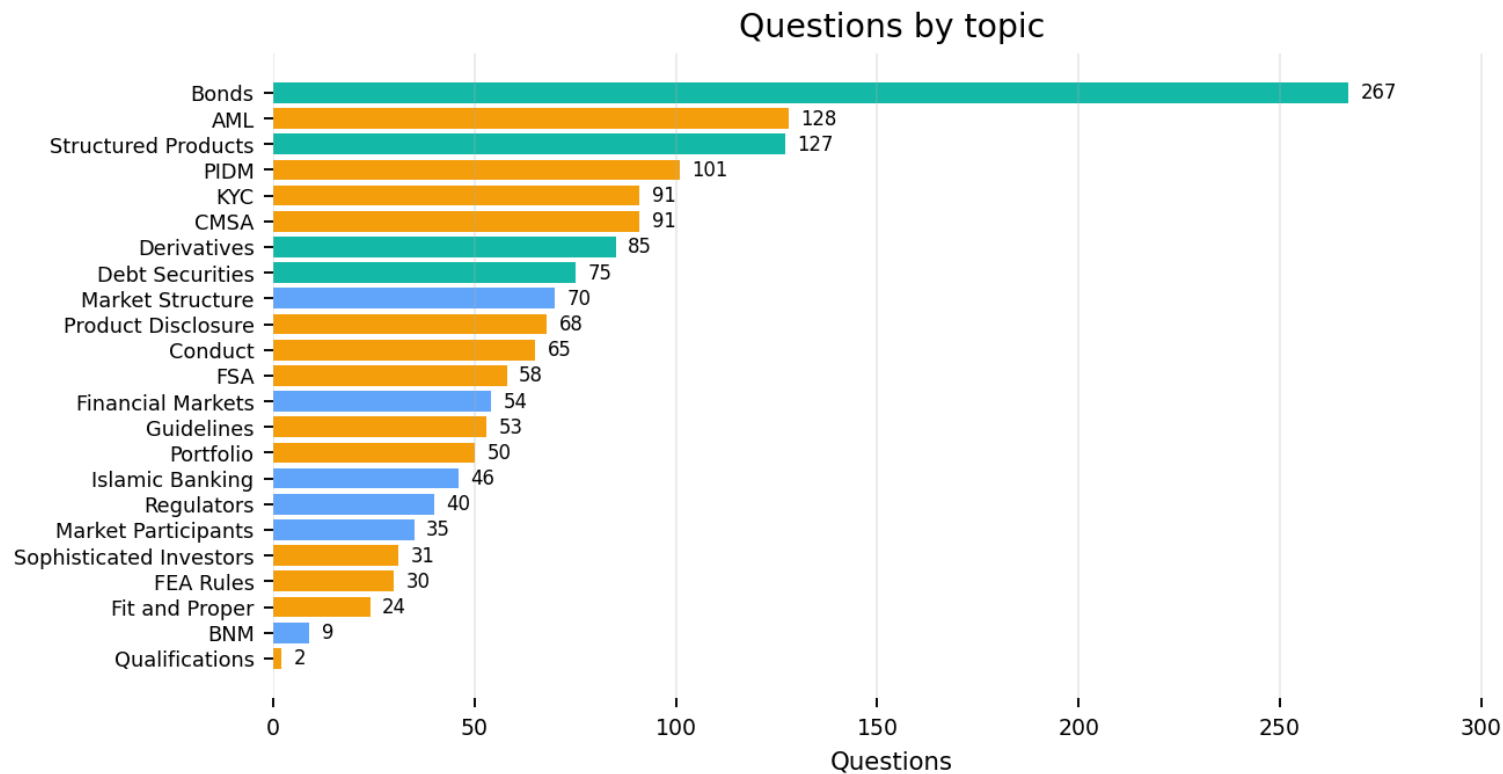

Interpretation

The bank remains broad and challenging. CLO2 is above target because IPPC is heavily regulatory and investor-protection focused. V70 preserves the balanced answer letters while adding a deeper wording, answer and explanation audit.

## 2. Topic Coverage Landscape

Topic counts show where revision emphasis sits across the V70 question bank.

### Coverage comment

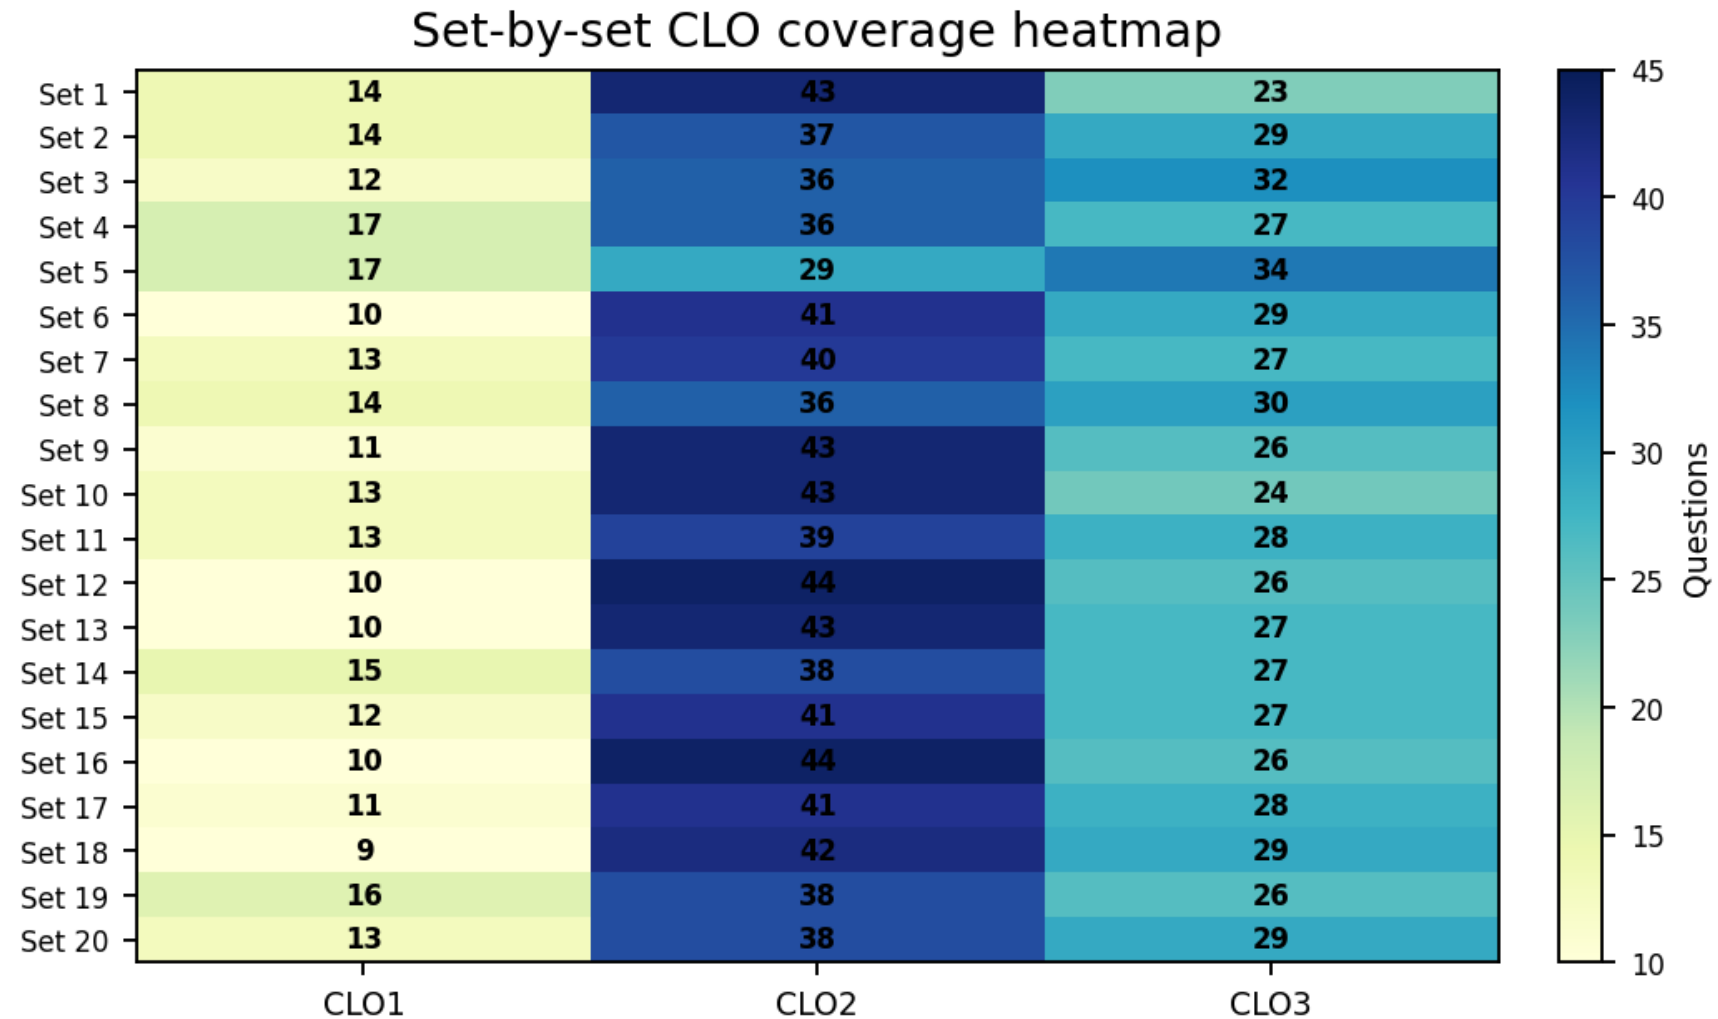

Bonds and structured products are large by design. Regulation is split across AML, FSA, CMSA, PIDM, disclosure and conduct.

### V70 status

Topic coverage is now based on the V70 bank after the deep audit. The latest changes focus on wording quality, answer correctness, explanation relevance, and STR/PIDM/duration cleanup.

### 3. Set-by-Set CLO Coverage

Every mock set contains all three CLOs; variance keeps the papers from feeling identical.

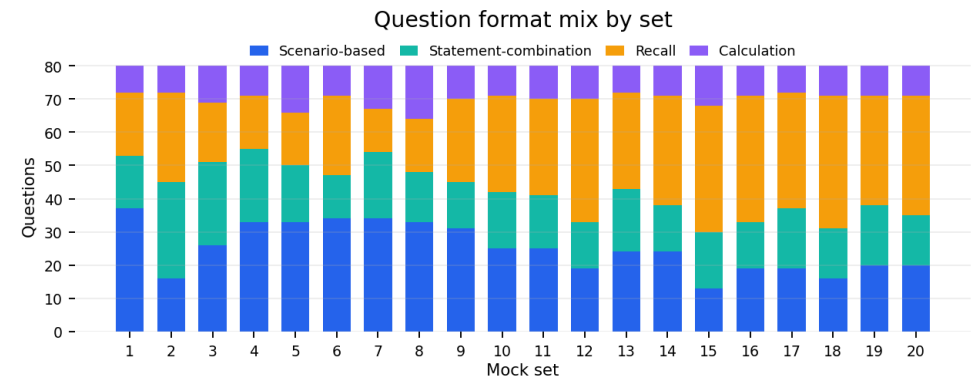

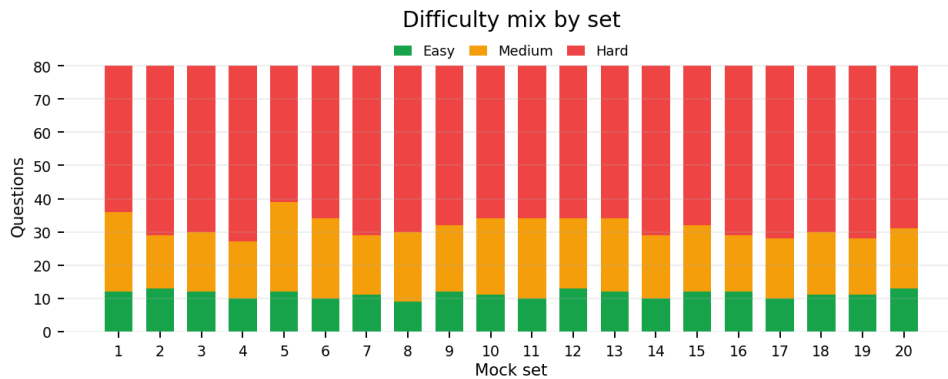

#### Interpretation

CLO2 dominates most sets, consistent with the official 45% weight. CLO1 ranges remain sufficient for financial-system coverage, while CLO3 remains substantial in every paper.

## 4. Set Diagnostics: Difficulty and Format

Set-level mixes confirm each mock is usable as a standalone practice paper.

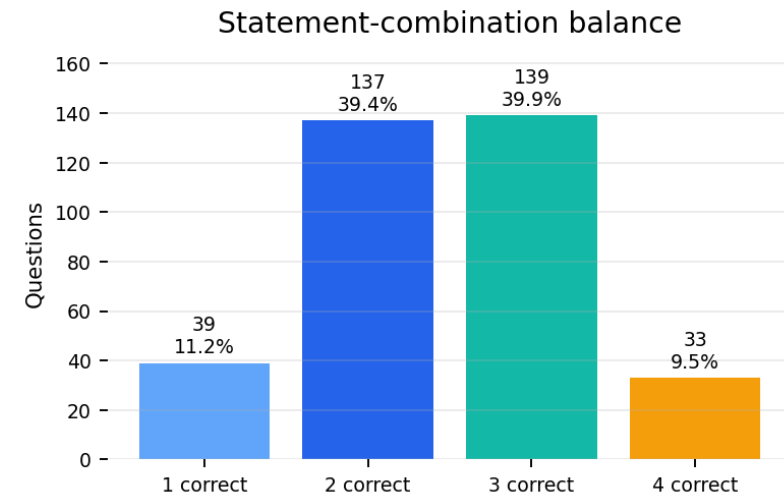

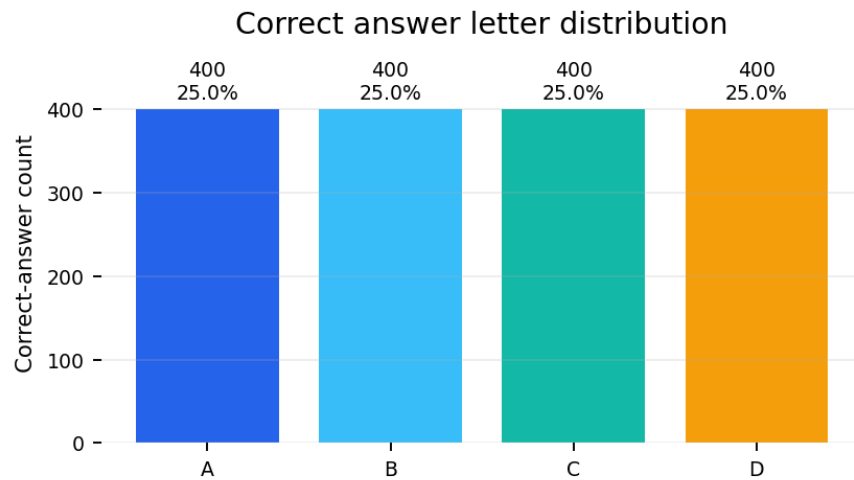

### Interpretation

Each set retains a challenging profile: 971 hard questions overall (60.7%). Formats remain mixed across scenario-based, statement-combination, recall and calculation questions.

## 5. Answer-Key and Statement Balance

Statement questions remain balanced; answer letters are now evenly distributed.

### Resolved issue

Each answer letter appears 400 times (25.0%). The prior A-answer skew has been removed.

### Statement balance

Roman numeral questions now mostly have two or three correct statements. One-correct and four-correct outcomes are deliberately less frequent.

## 6. V70 Duplicate and Integrity Audit

This is the main V70 amendment versus the earlier V66 analytical report.

### FINAL AUDIT ISSUES

**0**

independent V70 check

### WEAK/GENERIC REWRITES

**516**

V69 deep-audit stage

### SPECIFIC CONTENT FIXES

**89**

V70 final pass

### GZIP INTEGRITY

**Passed**

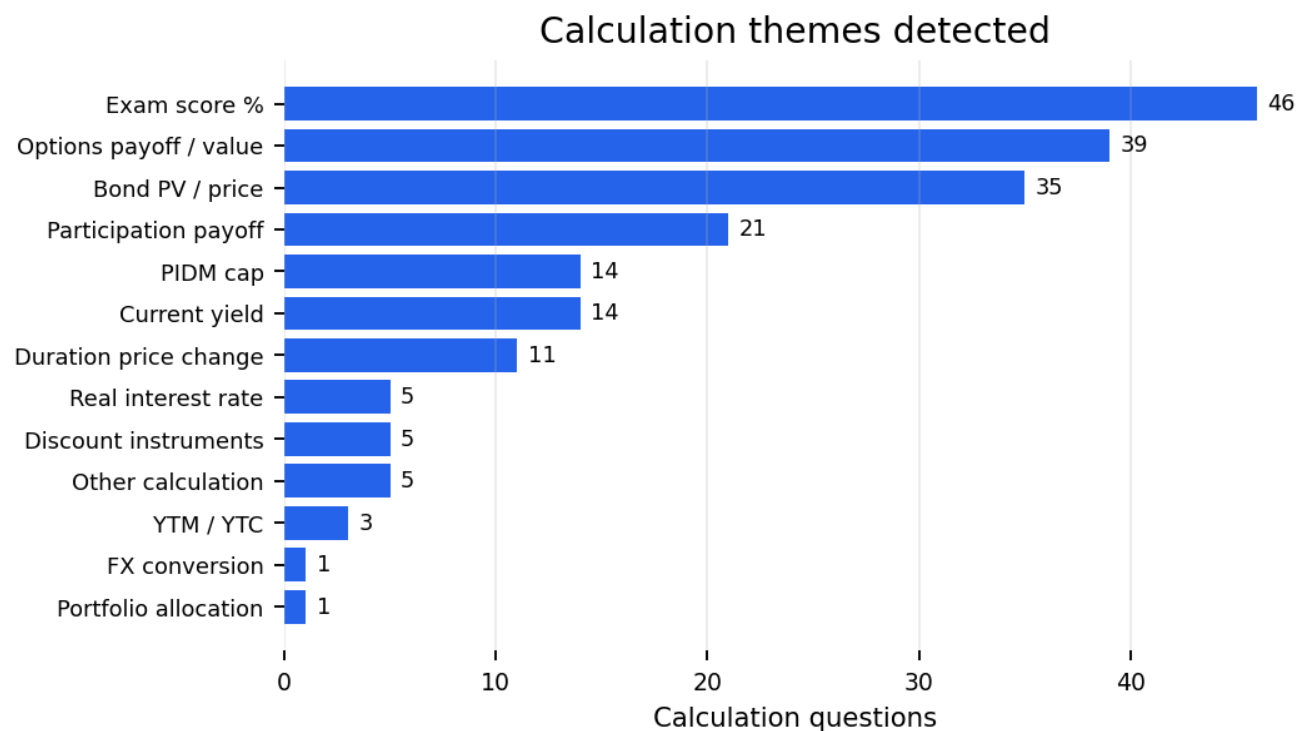

JSON and .gz match

## V70 audit conclusions

- **Deep wording audit** 516 weak/generic items were rewritten in the deep-audit stage.
- **Specific content fixes** 89 targeted content issues were patched in the final V70 pass, including STR/PIDM/duration wording.
- **Independent final check** Final issue count is 0; structural fields, answer indexes, duplicate checks and known semantic flags passed.
- **Deployment integrity** The JSON and compressed JSON were rebuilt inside the GitHub/Vercel package and verified as matching.
- **Answer-letter balance** Correct-answer letters remain evenly distributed at 400 each across A, B, C and D.

## 7. Calculation Question Diagnostics

All 200 calculation questions are retained in V70 and remain targeted at exam-style computation.

### CALC QUESTIONS

**200**

12.5% of bank

### FORMULA CUE

**200 / 200**

explicit formula wording

### CALC POLISH FLAGS

**0**

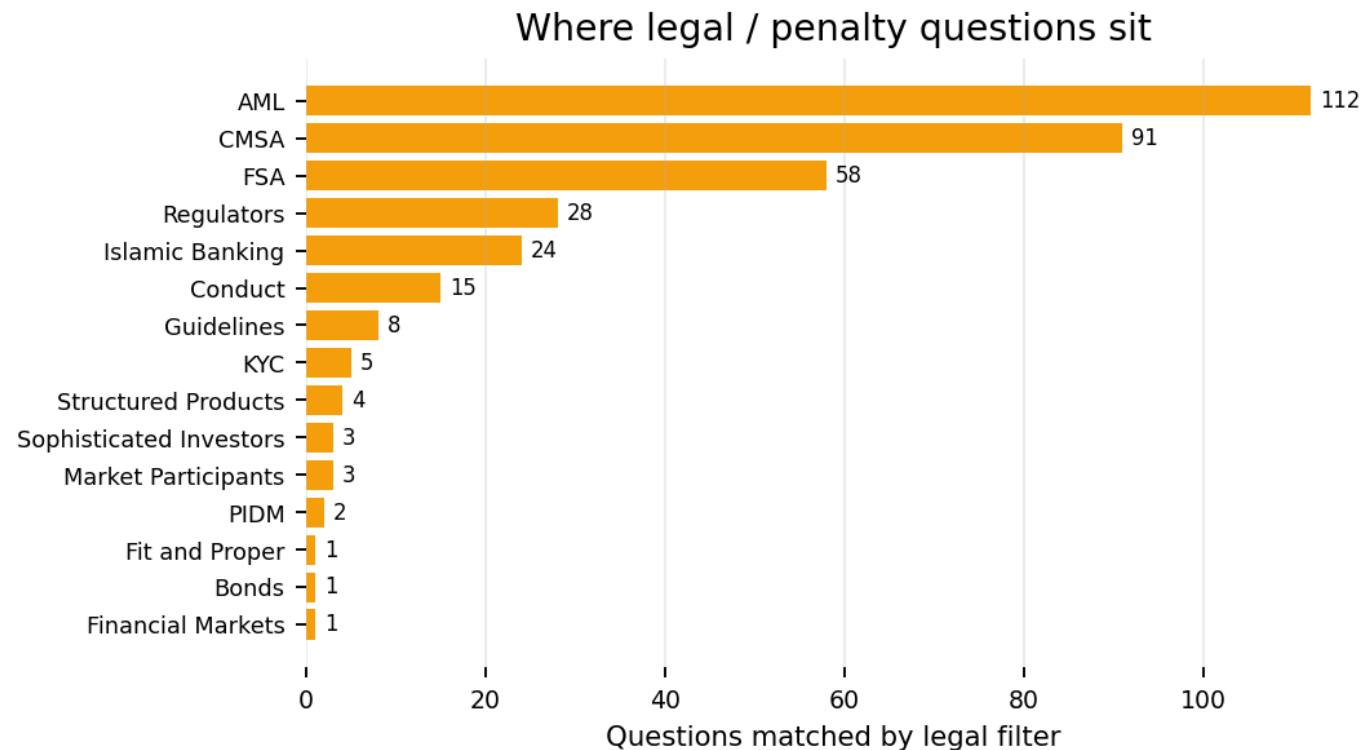

items to review

### Quality comment

V70 retains 200 calculation questions and replaces the weak calculation prompts flagged in V65. Formula cues are present across the calculation set.

## 8. Acts, Schedules, Fines and Penalties Filter

The virtual legal filter captures Act, section, breach, secrecy, disclosure, penalty and regulated-activity questions.

### FILTER MATCHES

**356**

Acts / schedules / fines

### SHARE OF BANK

**22.2%**

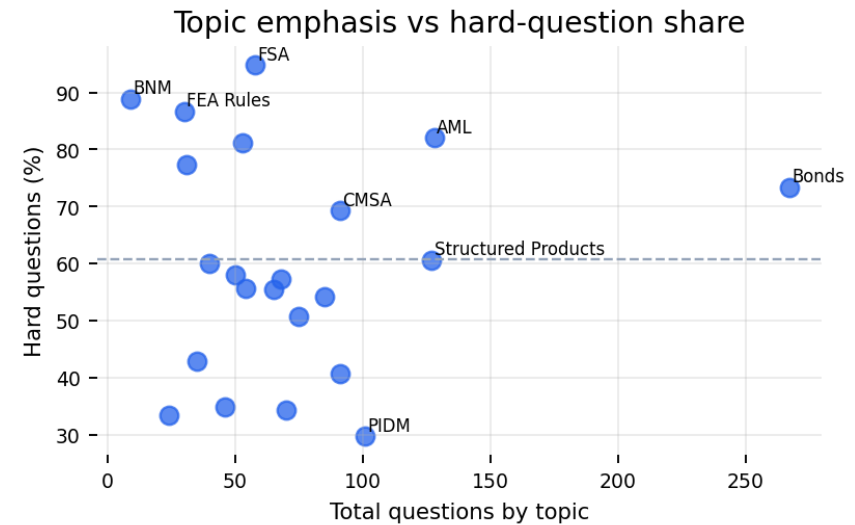

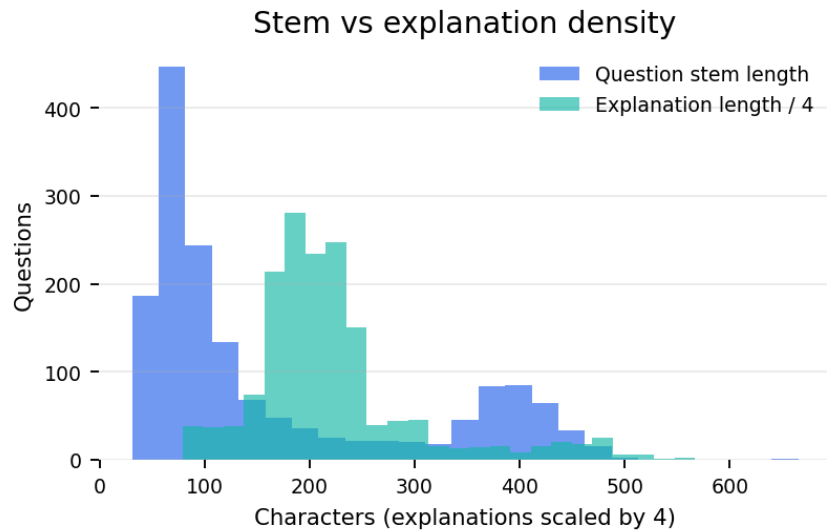

targeted legal revision

### Reader comment

The filter is broader than acts-only: it includes sections, breach consequences, secrecy, permitted disclosure, tipping-off and regulated-activity wording.

## 9. Explanation and Text Diagnostics

Text diagnostics support the audit finding: no empty explanations and no exact-repeat issues after V70.

### EMPTY EXPLANATIONS

0

no blank feedback fields

### LABEL MISMATCHES

0

answer key aligns

### DUPLICATE STEMS

0

V70 audit passed

### DUPLICATE ANSWERS

0

explanations unique

### Diagnostic note

V70 removes exact repeats. The text-density chart shows varied stem lengths and explanation depth across recall, scenario, statement-combination and calculation formats.

# 10. Final Scorecard and Recommendations

Final conclusion after coverage, wording, answer, explanation, calculation and duplicate audits.

|                         |                                                                           |        |
|-------------------------|---------------------------------------------------------------------------|--------|
| Coverage against CLOs   | Strong CLO2/CLO3 emphasis remains appropriate for IPPC                    | Strong |
| Set usability           | 20 standalone 80-question papers remain usable                            | Strong |
| Explanation quality     | Detailed explanations retained after duplicate cleanup                    | Strong |
| Calculation detail      | 200 calculation questions retained; weak calculation-question flags fixed | Strong |
| Duplicate cleanup       | Exact duplicate stems, Q+options and explanations remain zero             | Strong |
| Deep audit              | 516 weak/generic items plus 89 targeted issues patched across V69/V70     | Strong |
| STR/PIDM/duration fixes | Known wording/semantic flags are clean in the final audit                 | Strong |
| Answer-letter balance   | Balanced exactly: A/B/C/D = 400 each                                      | Strong |

## FINAL RATING

**9.8 / 10**

deep-audited final

## MAIN FIX

**Duplicates**

exact repeats removed

## RESOLVED FLAG 1

**Balanced**

answer letters

## RESOLVED FLAG 2

**0**

calc polish flags

## Final view

The V70 bank is suitable for serious exam practice. It is broad, challenging, explanation-rich and materially cleaner after the deep audit: duplicate checks remain clean, answer letters are balanced, STR/PIDM/duration issues were addressed, and the final independent audit reports zero issues.
