

Polished layout rebuild with larger charts, simplified page structure and clean spacing.

IPPC Question Bank Analytics

V74 Question-Phrasing Fixed

Quantitative review after V70 deep audit, V73 answer-length cleanup and V74 wording cleanup.

TOTAL MCQS 1,600 20 complete sets	PAPER DESIGN 80 MCQs per mock paper	PASS THRESHOLD 70% same benchmark	QUALITY RATING 9.7 / 10 post-V74 audit
V74 scope Reflects the latest V74 bank. It includes wording cleanup, answer-option length balancing and the Set 18 Question 57 Roman numeral display fix.	Formatting approach This version is rebuilt conservatively: fewer elements per page, larger charts, wider tables and clearer spacing to reduce clipping and visual clutter.

Syllabus Weighting: Actual vs Module Target

Overall Difficulty Mix

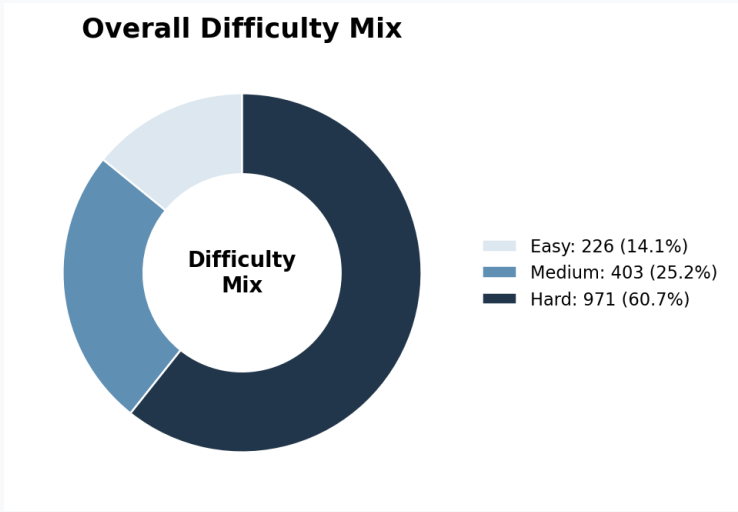

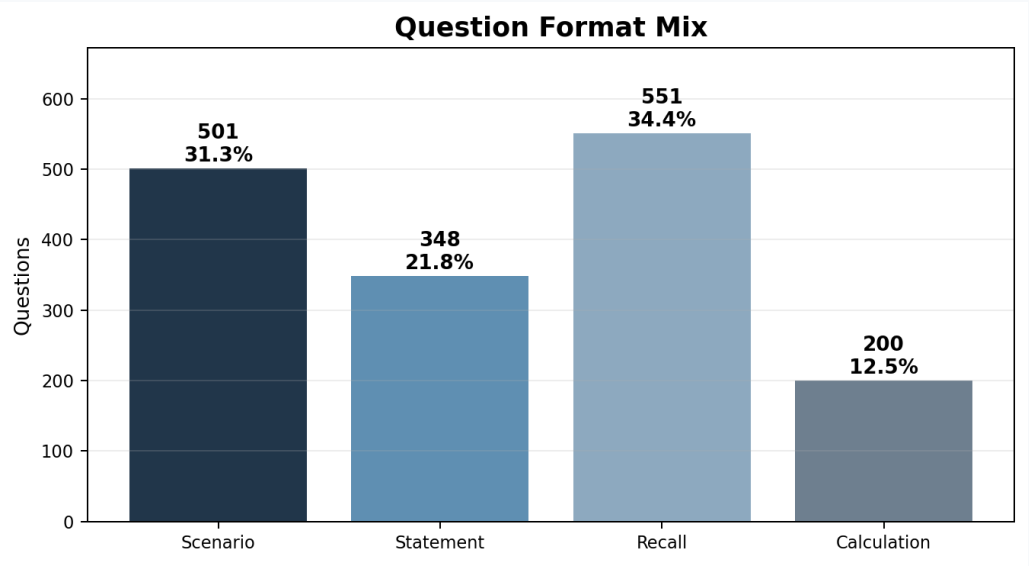

Dashboard interpretation

The bank is broad and challenging. CLO2 remains above the official target because IPPC is regulatory-heavy. Answer keys are exactly balanced at A/B/C/D = 400 each. The V74 wording audit shows 0 source-reference phrasing flags and 0 material answer-length bias flags.

2. Format and Difficulty Overview

Difficulty and question-format mix across the full 1,600-question bank.

Format readout

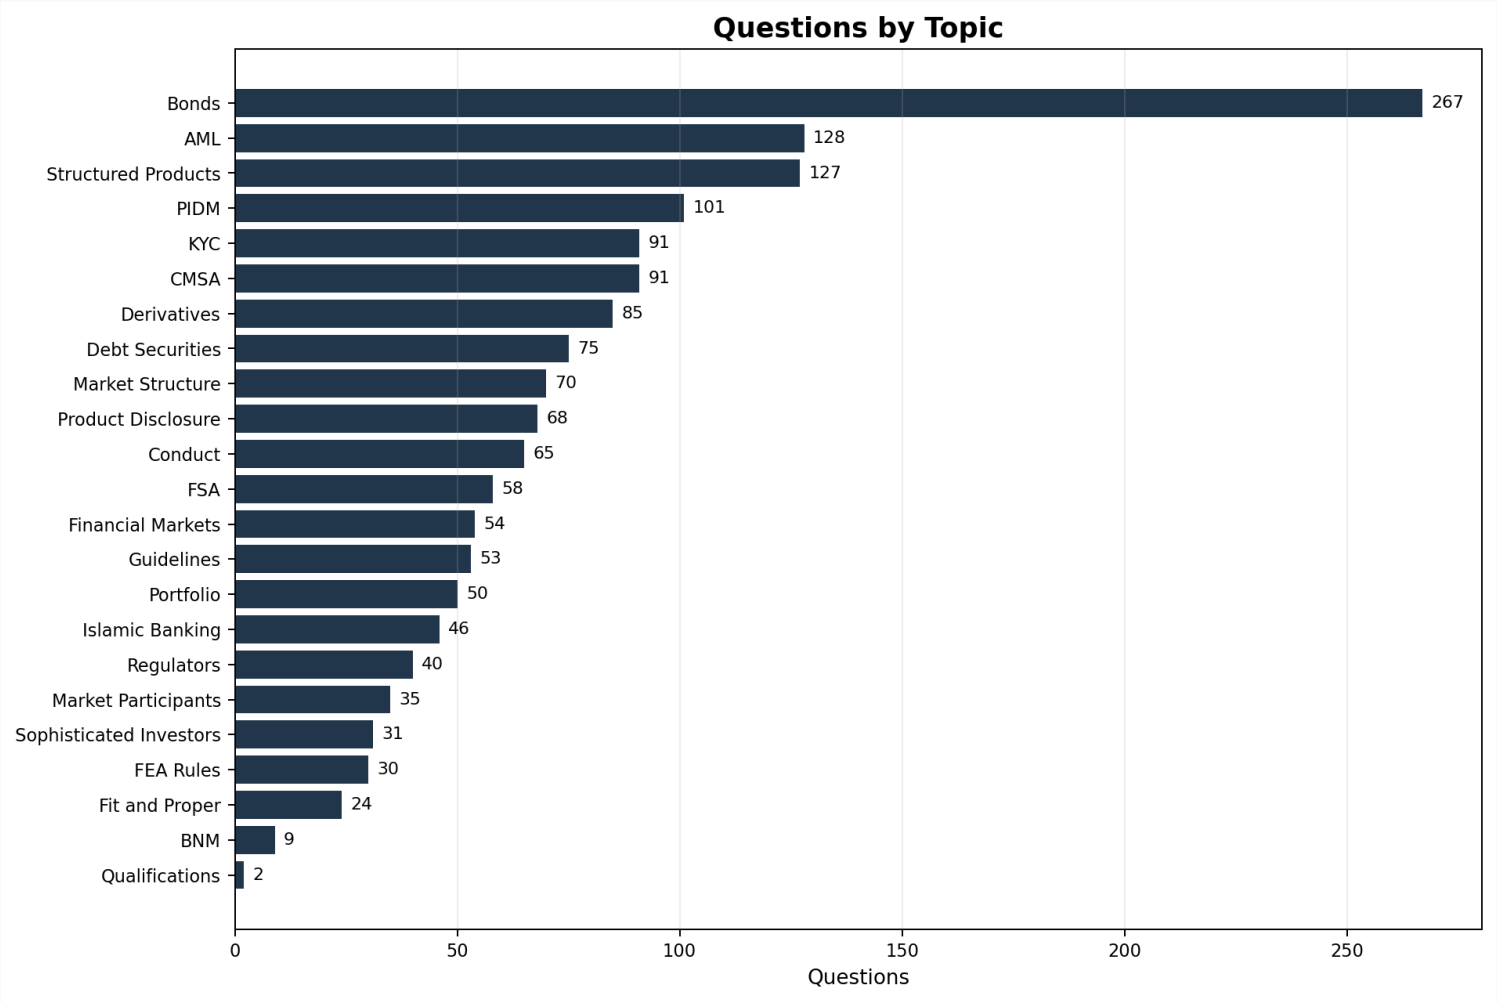

Scenario-based questions remain the largest format, followed by statement-combination questions. Calculation questions are retained at 200 items.

Difficulty readout

Hard questions form the majority of the bank, making the mocks suitable for serious practice rather than only basic recall. Distribution: Easy 226, Medium 403, Hard 971.

3. Topic Coverage Landscape

Topic counts show where revision emphasis sits across the bank.

CLO1: FINANCIAL SYSTEM

254

markets, institutions, regulators

CLO2: REGULATION

792

conduct, AML, PIDM, FEA

CLO3: DEBT & STRUCTURED

554

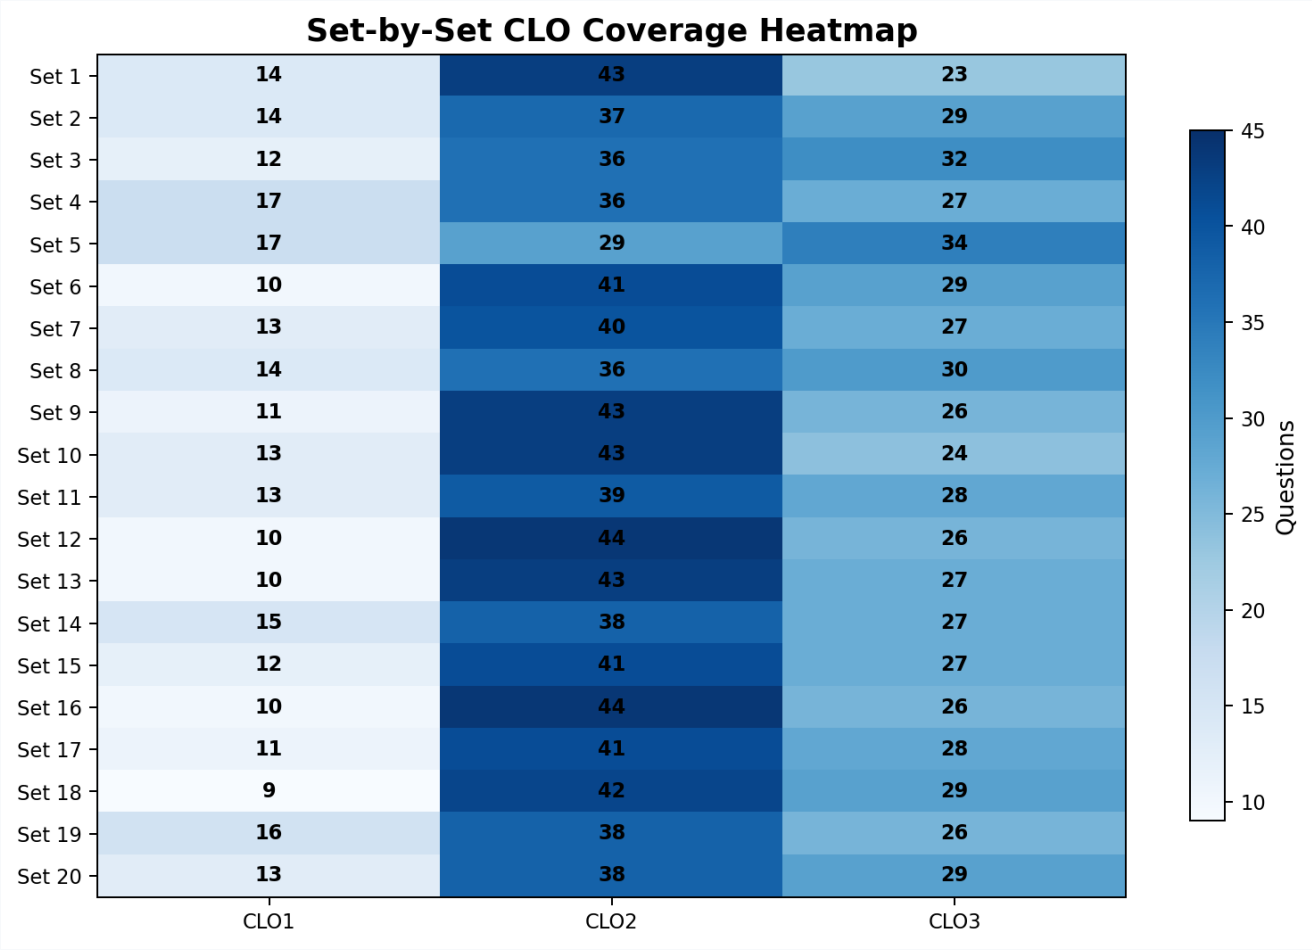

bonds, derivatives, products

Coverage comment

Bonds and structured products remain large by design. Regulation is split across AML, KYC, CMSA, PIDM, product disclosure, conduct and investor-classification rules.

4. Set-by-Set CLO Coverage

Every mock set contains all three CLOs; variance keeps papers from feeling distinct.

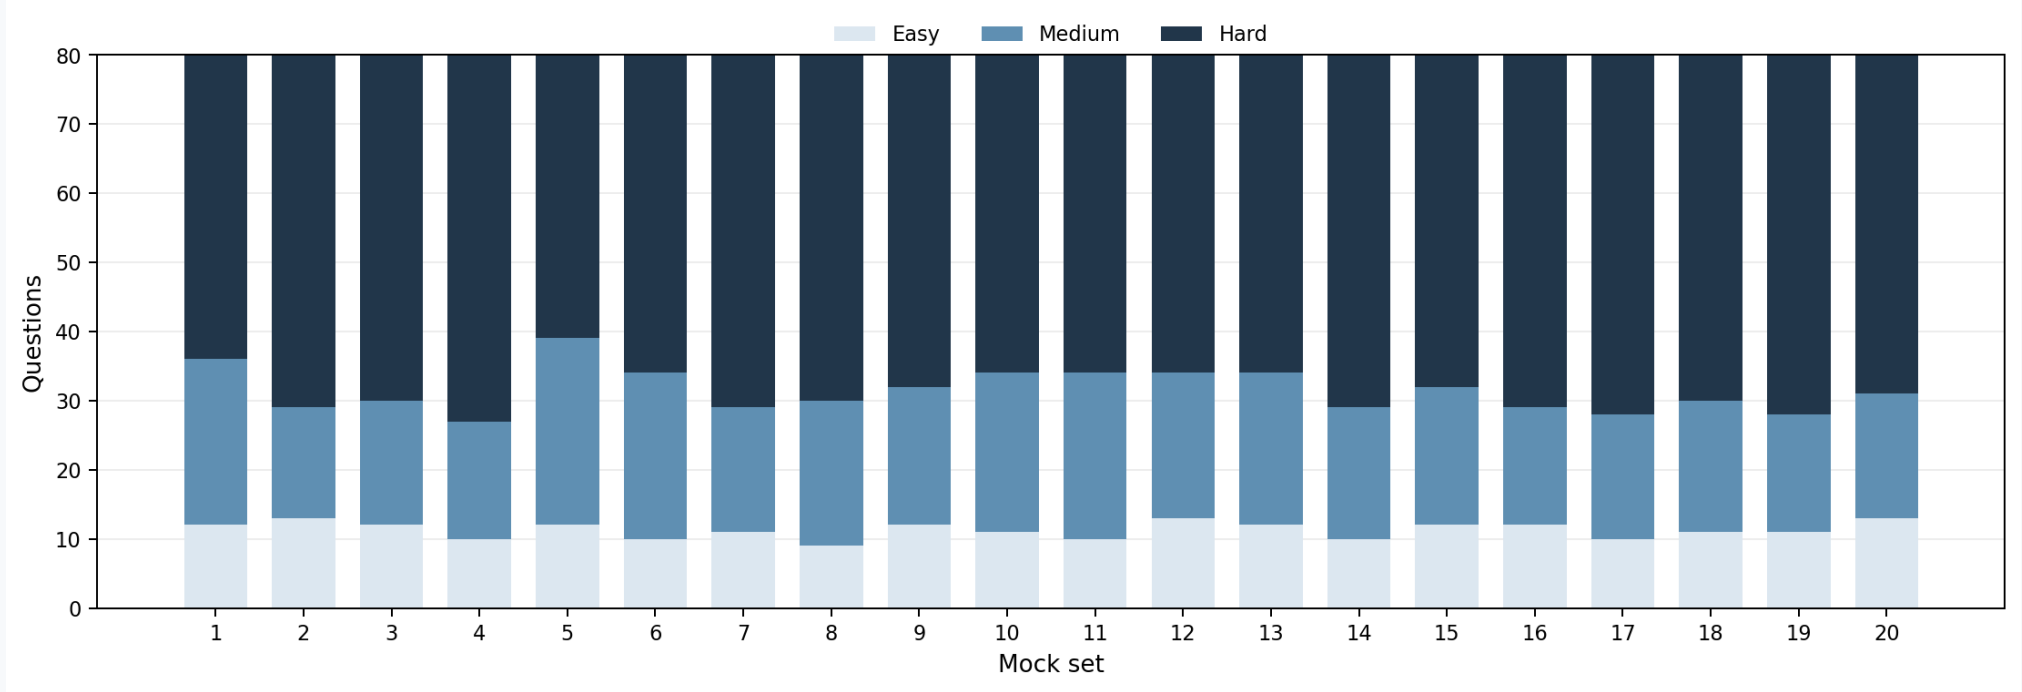

Interpretation

CLO2 dominates most sets, consistent with the regulatory weight and the nature of IPPC. Each 80-question paper still contains a mixed CLO profile rather than a single-topic block.

5. Difficulty Mix by Set

Set-level difficulty distribution for all 20 standalone mock papers.

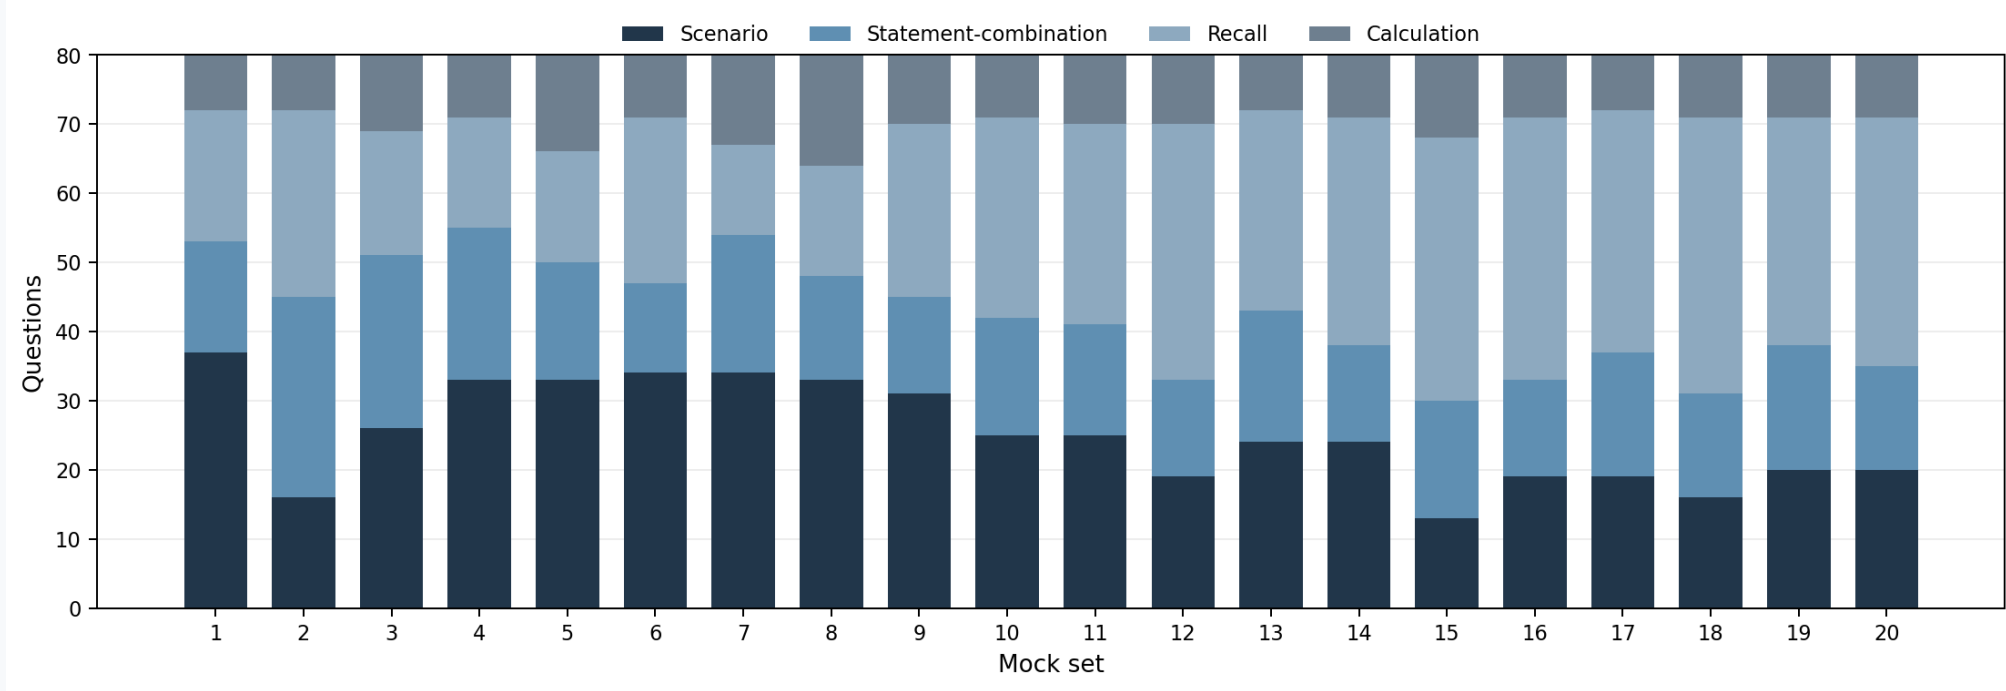

V74 check

Difficulty distribution remains stable after the V73/V74 fixes. No question-count changes were introduced: the bank still contains 20 sets of 80 questions each. The chart legend is separated from the plot area to avoid overlap.

6. Question Format Mix by Set

Set-level question format distribution for all 20 mock papers.

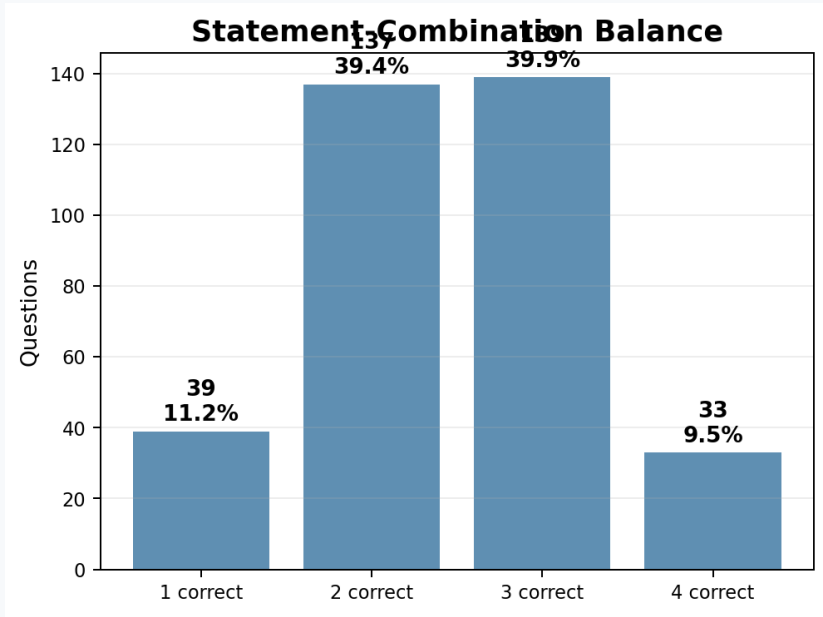

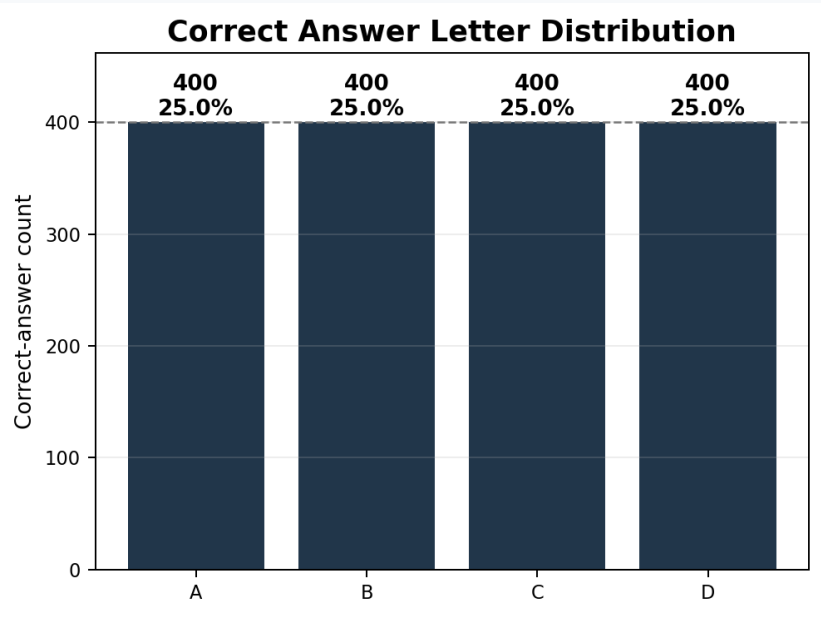

Format check

The bank continues to include scenario-based, statement-combination, recall and calculation questions in every paper. The chart has been enlarged and the legend moved clear of the plot area for readability.

7. Answer-Key and Statement Balance

Answer letters are exactly balanced; Roman numeral questions display correctly.

Answer-key balance

A, B, C and D each appear exactly 400 times as the correct answer. This removes answer-letter guessing bias.

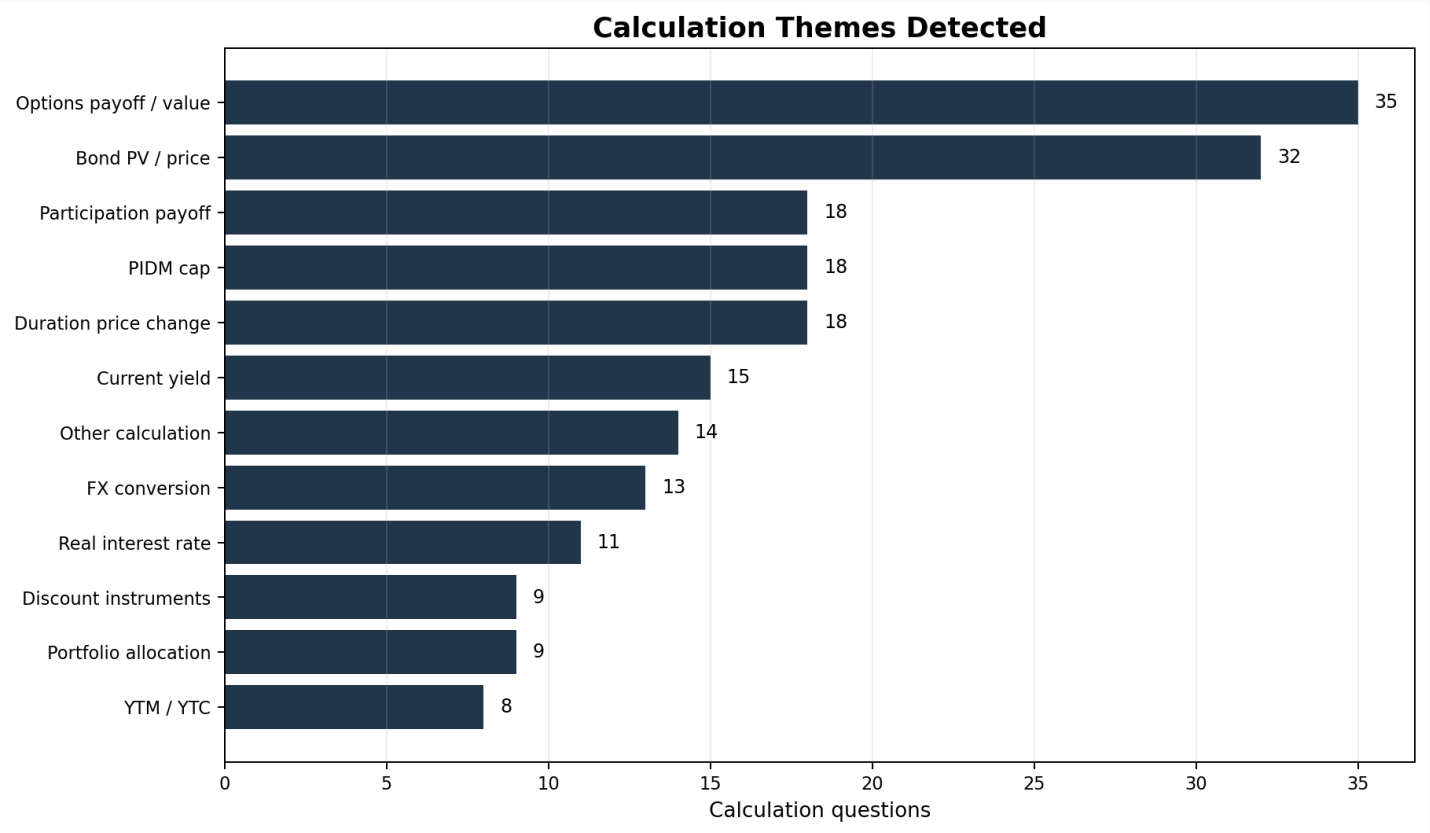

Roman numeral balance

The bank contains 348 statement-combination questions. Set 18 Question 57 now displays Roman numeral statements correctly.

Check	Result	Comment
Correct-answer distribution	Passed	A/B/C/D = 400 each
Statement-combination format	Passed	348 questions
Set 18 Q57 Roman numerals	Passed	Roman statements and answer choices present
Duplicate stems	Passed	0 duplicate stem groups

8. Calculation Question Diagnostics

Calculation questions retain formula helpers, detailed working and calculation cues.

CALC QUESTIONS

200
12.5% of bank

FULL WORKING

200 / 200
formula + steps + check

FORMULA HELPERS

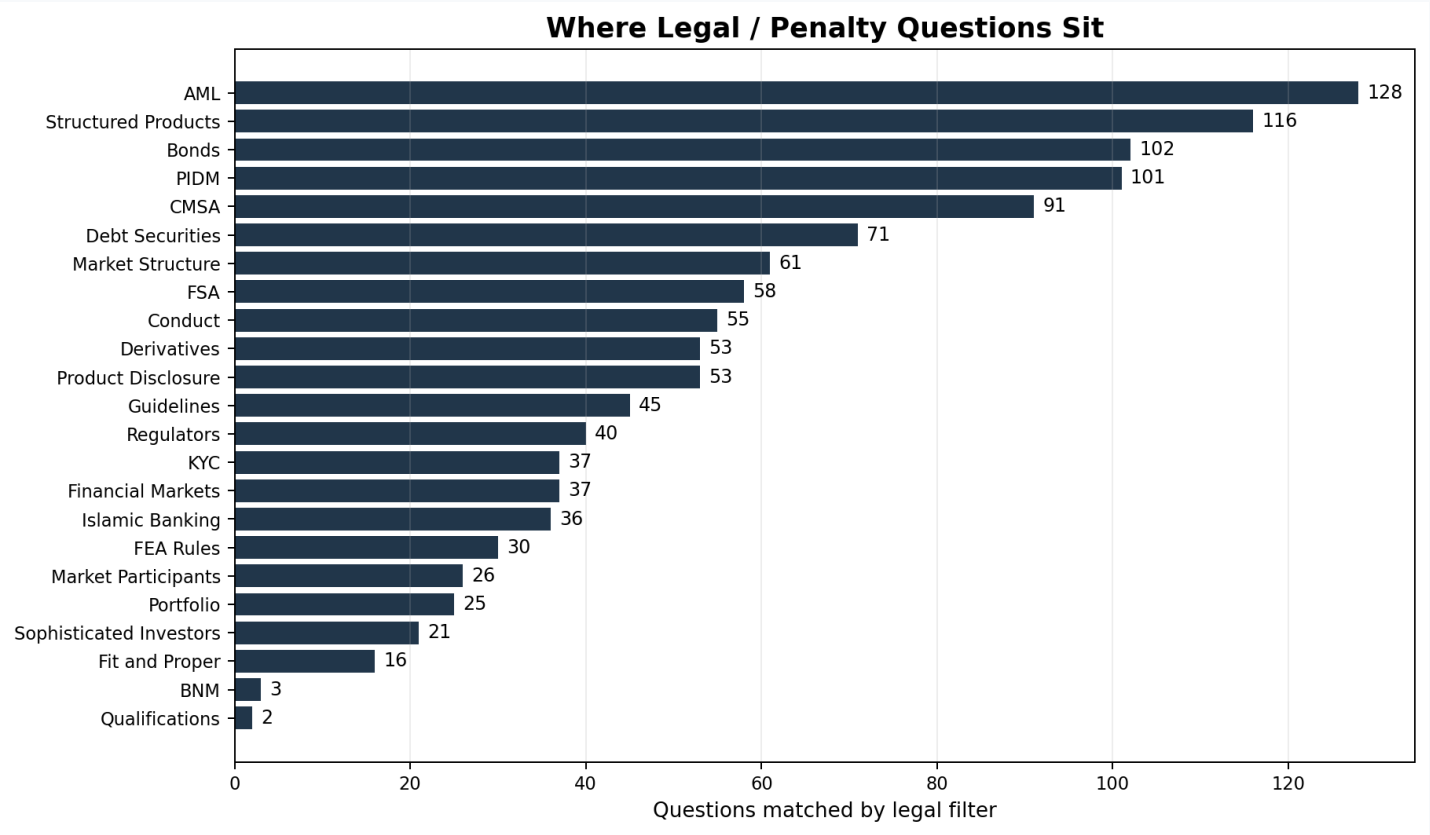

200 / 200
formula field populated

Quality comment

Calculation answers show intermediate values, not just final numbers. V74 did not disturb the calculation count or helper fields.

9. Acts, Schedules, Fines and Penalties Filter

The virtual filter captures legal, breach, section and penalty-focused questions.

FILTER MATCHES

1207

acts / schedules / fines / breaches

SHARE OF BANK

75.4%

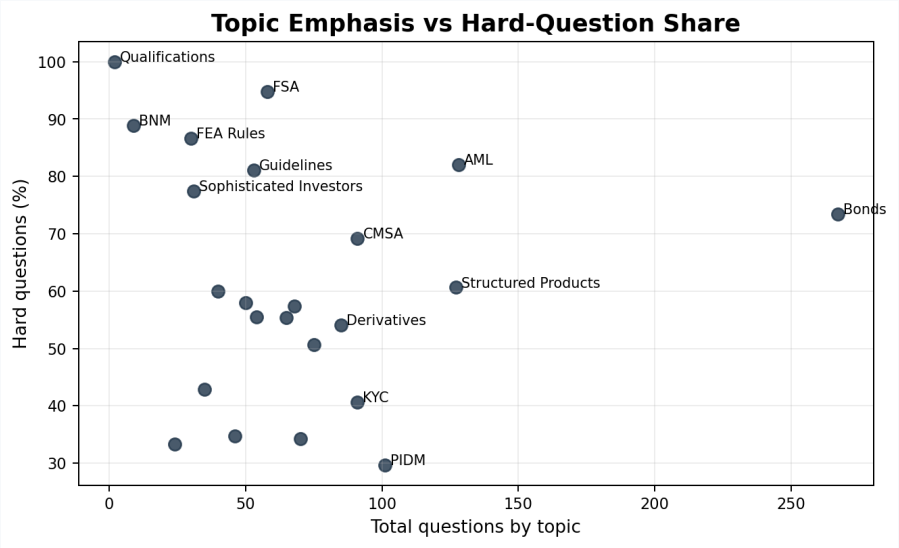

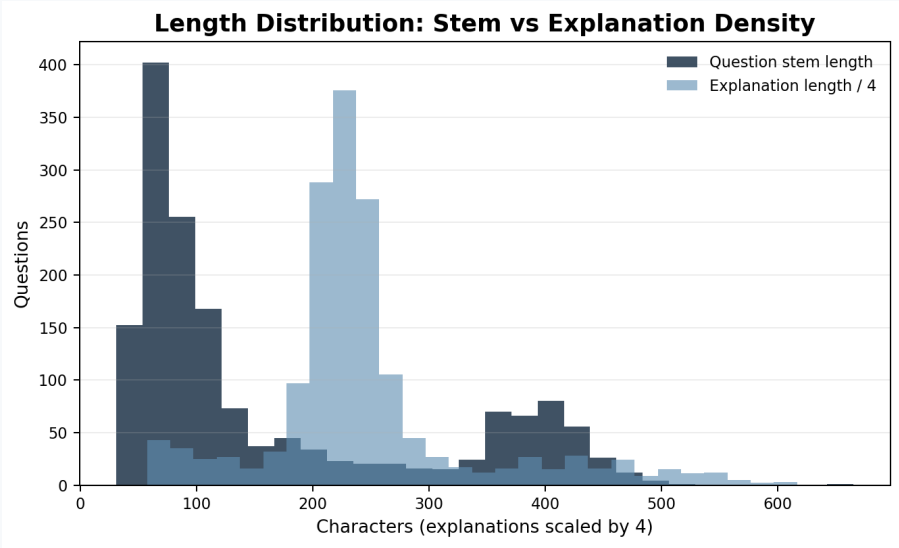

targeted legal revision

Reader comment

This filter is broader than acts-only. It includes section references, breach consequences, secrecy, permitted disclosure, tipping-off, AML/CDD wording, regulated-activity wording and PIDM/FEA rules.

10. Explanation and Text Diagnostics

Explanations are populated, aligned and free of source-reference wording.

WORDING FLAGS

0

V74 cleanup passed

Explanation quality summary

V70 added deeper explanations; V74 then cleaned unnatural source-reference phrasing. Explanations avoid phrases such as "Study Text", "textbook" and "IPPC exam context" while still explaining why the correct answer is right and why distractors are wrong.

11. V74 Wording and Answer-Length QA

Specific audit of user-reported issues: answer-length bias and unnatural phrasing.

STUDY TEXT PHRASES

0

0 expected

TEXTBOOK PHRASES

0

0 expected

FOCUS-NUMBER FLAGS

0

STR artefacts removed

MATERIAL LENGTH BIAS

0

strict threshold

Audit item	V74 result	How it was checked
Awkward source-reference phrasing	0 flags	Scanned stems, options and explanations for Study Text, textbook and exam-context wording.
Broken STR focus-number wording	0 flags	Scanned suspicious-transaction and AML items for focus-number artefacts.
Material correct-answer length bias	0 flags	Correct option must be longest by ≥ 50 chars and $> 1.35\times$ nearest distractor to flag.
Raw correct option uniquely longest	493 / 1600	Reported transparently; raw longest alone is not a fail where options are similarly phrased.
Moderate length watch candidates	39 / 1600	Correct option longest by ≥ 30 chars; monitored as watch items, not material bias flags.
Set 18 Question 57 display	Passed	Stem contains Roman numerals I-IV and answer options use Roman numeral combinations.
Duplicate checks	Passed	0 duplicate stems, 0 duplicate question-option groups and 0 duplicate explanations.

Interpretation

The V74 cleanup removes unnatural source-reference phrasing without changing bank size. Raw longest-answer cases remain for legal/scenario items, but no option triggers the strict material-bias rule.

12. Final Scorecard and Recommendations

Final conclusion after coverage, wording, answer, explanation and calculation audits.

Area	Assessment	Comment
Coverage against CLOs	Strong	CLO2/CLO3 emphasis is appropriate for IPPC; all CLOs appear in every mock set.
Set usability	Strong	20 standalone 80-question papers; each set mixes topics, difficulty and formats.
Explanation quality	Strong	Option-by-option and statement-by-statement feedback retained after V74 wording cleanup.
Calculation detail	Strong	200/200 calculation questions include formula helper and detailed working.
Question wording	Strong	V74 removed source-reference wording and broken STR focus artefacts.
Answer-letter balance	Strong	A/B/C/D exactly balanced at 400 each.
Answer-length balance	Strong	No material correct-answer length bias flags under the final strict audit rule.
Residual watch item	Minor	Raw longest-answer cases should be monitored in future versions, but none trigger material bias.

Final view

The V74 bank is suitable for serious exam practice. It incorporates the V70 deep audit, the V73 answer-length and Roman numeral fixes, and the V74 phrasing cleanup. The final quality profile is broad, challenging, source-aligned and deployable.
