

IPPC Question Bank

Analytical Report

V86 clean report - pages 2, 9 and 12 spacing fixed

1,600

Questions

20 mock sets x 80 MCQs

400 each

Answer key

A/B/C/D exactly balanced

200

Calculations

Numerical practice retained

0

Critical / high findings

Only medium watchlist items remain

Report purpose

This version rebuilds the report using a stricter grid, larger charts, fewer competing elements per page, consistent page margins and simpler tables to avoid clipping or overlap.

QA-ready

Question bank status
No severe audit flags

What changed in V86

- Separated KPI cards from the CLO chart.
- Removed cramped dashboard spacing on page 2.
- Kept V79-style presentation feel while reflecting latest QA status.

CLO coverage: actual vs target

Dashboard readout

The question bank remains structurally sound: 20 full mock sets, balanced answer keys, 200 calculation items, no duplicate stems/options/explanations, and no critical or high audit findings after cleanup.

CLO	Count	Actual	Target	Var.
CLO1	251	15.7%	15%	+0.7%
CLO2	795	49.7%	45%	+4.7%
CLO3	554	34.6%	40%	-5.4%

Interpretation

CLO1 is close to target. CLO2 remains slightly overweight and CLO3 slightly underweight based on topic-label proxy. A future strict-weighting pass could add more debt securities and structured product questions.

Question format mix

Difficulty distribution

Design note

The bank intentionally mixes recall, scenario-based, statement-combination and calculation items. The high hard-question share reflects the requested exam-strengthening passes.

Readout

All 20 sets remain at 80 items. Difficulty mix is deliberately demanding, with hard and medium items spread across the bank.

Readout

Calculations, statement-combination items, scenario-based items and recall items are distributed across sets to reduce predictability.

CLO distribution by mock set (question counts)

CLO1	14	14	12	17	16	10	13	14	11	13	13	10	10	15	12	9	11	9	15	13
CLO2	42	33	35	35	28	40	38	34	41	39	36	40	41	33	38	43	38	39	37	35
CLO3	24	33	33	28	36	30	29	32	28	28	31	30	29	32	30	28	31	32	28	32
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20

Readout

Each set contains a practical combination of Malaysian financial system, regulatory/guideline and debt/structured-product questions.

Topic coverage - largest groups

Topic	Q	%
Bonds	267	16.7%
AML	128	8.0%
Structured Products	127	7.9%
PIDM	104	6.5%
KYC	91	5.7%
CMSA	91	5.7%
Derivatives	85	5.3%
Debt Securities	75	4.7%

Interpretation

Coverage remains strongest in Bonds, AML, Structured Products, KYC, CMSA and Derivatives. These are central exam areas and support the app topic filters.

Calculation items by set

200

Calculation questions
Bond, derivative and structured-product items

0

Formula-helper flags
No unresolved helper text

0

Generic filler flags
No generic calculation prompts

Readout

Calculation items remain concentrated in bond/debt/structured-product applications, including yield, price, current yield, discount return, duration and payoff mechanics.

Check	Result	Status
A/B/C/D distribution	400 / 400 / 400 / 400	Pass
Duplicate stems	0	Pass
Duplicate Q + options	0	Pass
Duplicate explanations	0	Pass
Critical findings	0	Pass
High findings	0	Pass
Medium watchlist	88	Review only

Interpretation

The answer key remains exactly balanced. The 88 medium items are answer-length-skew heuristics only and are not content-blocking defects.

QA exception counts after cleanup

High-risk areas rechecked

- Set 1 Q75 format and explanation mismatch fixed.
- Derivative contamination removed from non-derivative explanations.
- Calculation explanations cleaned of generic filler.
- Roman numeral and market-structure repeated blocks checked.

Result

The remaining findings are medium answer-length-skew signals only. They do not indicate duplicate questions, missing explanations, calculation-text errors or severe formatting faults.

Pass

Question bank integrity

No duplicates or malformed options

Report embedded in app package

What to use now

- Use the V86 GitHub/Vercel ZIP for deployment.
- The embedded report is the clean V86 formatted version.
- The question bank carries the V83/V84 QA status into this V86 report package.

Metric	Result
Questions	1600
Mock sets	20 x 80
A/B/C/D	400 each
Calculations	200
Critical/high findings	0
Report formatting	Fixed

Verdict

Pages 2, 9 and 12 have been respaced to remove cramped KPI cards and text overlaps. The app package is ready for deployment with this V86 PDF.
