

IPPC Question Bank Analytical Report - V117

Formatted report refresh. Built from the Round 18 zero-flag audit and the V117 formulaic-wording-fixed question bank.

Final audit package V117 question bank

A cleaner presentation-style report with larger text, tighter alignment, consistent card sizing and no clipped/overlapping visual elements.

ROUND 18 INDEPENDENT AUDIT

9.4/10

Automated audit score cap applied

0 critical / 0 high / 0 medium / 0 low flags

QUESTION BANK SIZE

Fresh production build passed

Scope note

This report summarises automated structural, distribution, wording, duplication, semantic-sentinel and build checks. It is not a substitute for manual legal/regulatory proofing of every question against official IPPC materials.

Executive dashboard

What the latest package validates and what was fixed from the earlier report iterations.

25 full exam sets

PER-SET OPTIONS

20 each

A/B/C/D in every set

AUDIT FLAGS

0 total

Round 18 clean result

What changed by V117

- V111 removed all generic explanation wording and replaced it with topic-specific reasoning.
- V112 removed repeated explanation sentences; V113 fixed awkward explanation wording.
- V114 rewrote duplicate explanations; V115 cleaned answer-header punctuation.
- V116 strengthened thin Roman-statement reasoning; V117 replaced the final formulaic PIDM/TIPS wording flag.

Readiness summary

The current report removes the earlier header/card overlaps, oversized empty gaps and uneven panel spacing. Content is grouped into readable panels with larger type, consistent margins, and separated charts/tables.

Answer distribution integrity

No option-skew cueing detected across the whole bank or within individual sets.

A ANSWERS

500

25.0% of total

B ANSWERS

500

25.0% of total

C ANSWERS

500

Overall answer-key balance

A

500 / 2,000

B

500 / 2,000

C

500 / 2,000

D

500 / 2,000

Control note

Each of the 25 sets contains exactly 20 A, 20 B, 20 C and 20 D answers, removing simple answer-pattern advantages for learners.

Official benchmark alignment

The bank is structured to mirror the current IPPC exam format and module weighting.

Pass threshold

PRACTICE SETS

25

2,000 total questions

Requirement	V117 setting	Formatting/coverage treatment
Exam length	80 MCQs	Each generated set has 80 independent multiple-choice questions.
Time allowed	2 hours	Designed around the official online-exam duration.
Pass mark	70 and above	The app can benchmark learner performance against the pass band.
Coverage	CLO1 / CLO2 / CLO3	Question coverage follows the official 15% / 45% / 40% weighting.

Use case

The question bank is a revision and weak-area tracking tool. It is meant to provide repeated exam-style practice and diagnostics, not to predict actual live exam questions.

CLO weighting integrity

Exact match to the 15% / 45% / 40% module split.

CLO1**300**

15.0% - Malaysian financial system

CLO2**900**

45.0% - Regulation, PIDM and AML/CFT

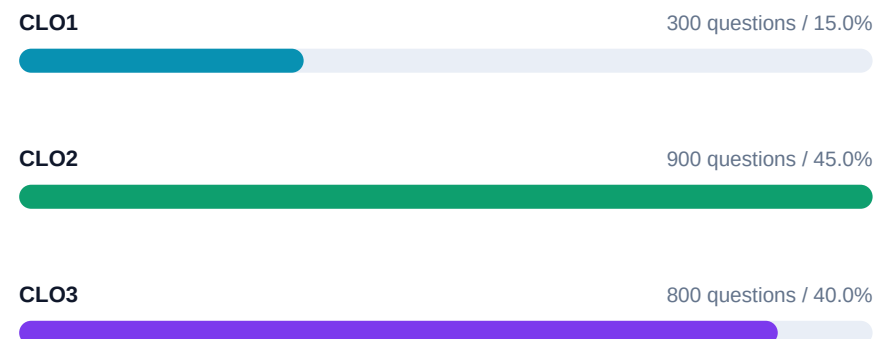

CLO3**800**

40.0% - Debt securities and structured products

CLO share of question bank

CLO distribution bars

Interpretation

CLO1 covers Malaysian financial markets and participants. CLO2 carries the largest weighting and covers regulation, permitted activities, PIDM and AML/CFT. CLO3 covers debt securities, valuation, investment risks and structured products.

Question-format mix

Scenario, recall, statement-combination and calculation coverage after final cleanup.

SCENARIO-BASED

771

38.6% of bank

RECALL

609

30.4% of bank

STATEMENT-COMBINATION

12.1% of bank

Format share of question bank

	Scenario-based	771
	Recall	609
	Statement-combination	378
	Calculation	242

Format distribution bars

Coverage note

The final bank retains a broad mix of exam-style prompts. Calculation questions have formula integrity, answer matching and worked-step checks passing.

Difficulty and challenge profile

Hard-mode sets plus full-bank difficulty mix.

HARD

1320

66.0% of bank

MEDIUM

Question JSON loads

Calculation integrity readout

- No calculation-answer mismatches were detected by the audit.
- Formula working, payoff wording and explanation completeness checks are clean.
- Bond pricing, yield, structured-product payoff, participation and PIDM/TIPS-style items remain included.
- The final residual formulaic wording flag was rewritten into a PIDM/TIPS-specific explanation.

Learner impact

The calculation section now supports applied revision rather than answer memorisation: formula cues, steps and rationales are intended to show how the final answer follows from the tested concept.

Explanation quality gates

Learner-facing wording checks after V111-V117 cleanup.

GENERIC WORDING

High-similarity pairs retained

25 visible / 0 flagged

Canonical near-duplicate clusters

0

Stem-template repetition groups

0

Extreme-audit quality gates

Fresh build, semantic sentinels and regression checks.

Gate	Result	Interpretation
Fresh build	Pass	npm ci and production build completed
Structural integrity	Pass	2,000 questions; 25 sets; 80 per set
Answer balance	Pass	500 per option overall; 20 per option per set
CLO weighting	Pass	15% / 45% / 40% exact
Set 21 Q8 sentinel	Pass	Market-structure semantic error remains fixed
Semantic sentinels	8/8 pass	Targeted checks for prior high-risk topics
Flags by severity	0 / 0 / 0 / 0	Critical / High / Medium / Low

Important caveat

The audit is automated. It is strong for structure, duplicates, answer balance, wording quality and known semantic sentinels, but it cannot guarantee that every legal/regulatory nuance across all 2,000 questions has been manually verified against the official materials.

V117 final scorecard

Current recommended deployment package.

DEPLOYMENT

Ready

Use V117 report package

Recommendation

Use V117 as the current deployable version. The report and app now point to the V117 audit state, with all previously identified critical, high, medium and low automated-audit flags cleared.

Manual review reminder

Before calling the bank legally perfect, perform a manual line-by-line regulatory review against the official IPPC study text and module specification. The automated score remains capped at 9.4/10 for that reason.
