

IPPC Question Bank Analytical Report

V97 report update - reflects the question-diversity pass and statement-by-statement explanation rebuild.

Total bank

2,000

25 sets x 80 questions

Normal bank

1,600

20 standard mock sets

Hard Mode

400

5 advanced hard sets

Calculation items

265

All with formula and steps

Report purpose

This report updates the analytical view after V92. It confirms the larger 2,000-question bank, the separate 400-question Hard Mode, full answer-balance maintenance, and the calculation-explanation audit showing 265/265 calculation items now include formula and step-by-step working.

Prepared for IPPC Study Suite deployment package. Official exam benchmark used: 2 hours, 80 MCQs, pass mark 70 and above, and module weighting 15% / 45% / 40%.

Total questions
2,000
25 complete sets

Answer balance
500 each
A/B/C/D exactly balanced

What changed since the old report

- Question bank now reports 2,000 items, not 1,600.
- Hard Mode is included as 5 x 80 advanced-only sets.
- Calculation diagnostics now report 265 items with full steps.
- Report labels and embedded app path updated to V97.

Question-format composition by section

Executive readout

The deployment bank is larger and more advanced than the earlier 1,600-question baseline: the original core remains intact, Hard Mode adds 400 advanced questions, and calculation explanations now include formula, working and step numbering.

Core normal bank

20 x 80

1,600 standard questions

Hard Mode bank

5 x 80

400 advanced questions

Deployment bank

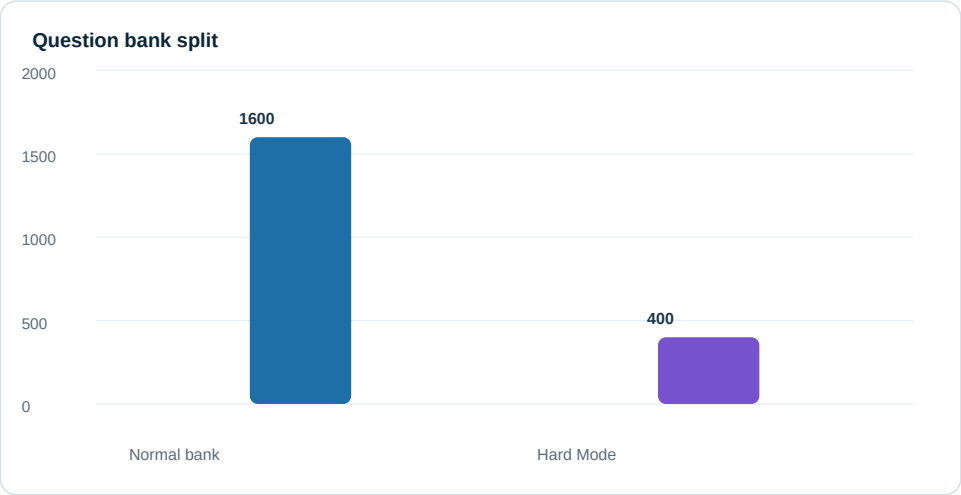

25 x 80

2,000 total questions

Calculation audit

265/265

Formula + Step 1 + Working

Metric	Value	Comment
Total questions	2,000	Source: public/questions.packed.json
Standard mock sets	20	80 questions each
Hard Mode sets	5	80 questions each, all hard
Answer distribution	500 each	A/B/C/D balance maintained
Calculation questions	265	All audited for formula and steps
Report file	V97	New embedded PDF path and labels

Deployment note

Use the V97 minimum ZIP for GitHub/Vercel. It contains only the production files plus the updated report PDF, while the full package also includes the audit JSON and changelog.

Exam duration

2 hours

Official benchmark

Format

80 MCQs

Independent questions

Pass mark

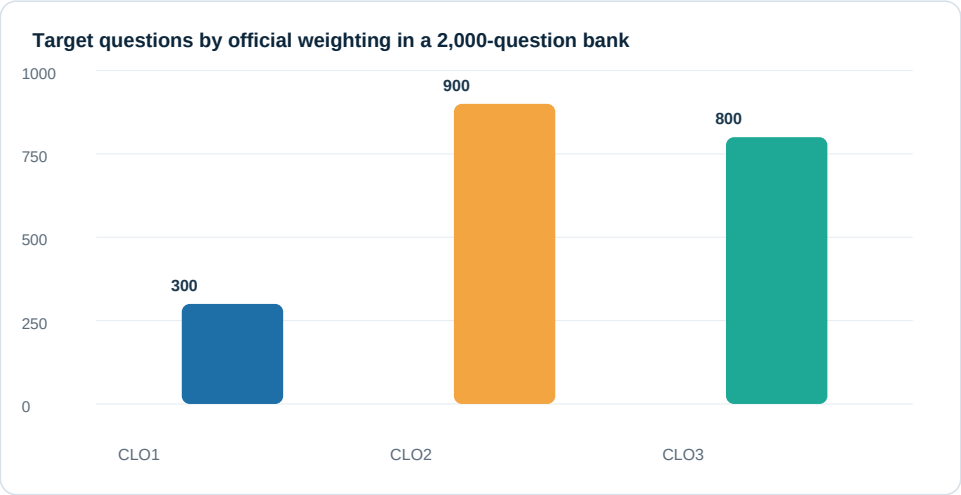

70+

Pass threshold

Bank coverage

25 sets

25 complete 80-item sets

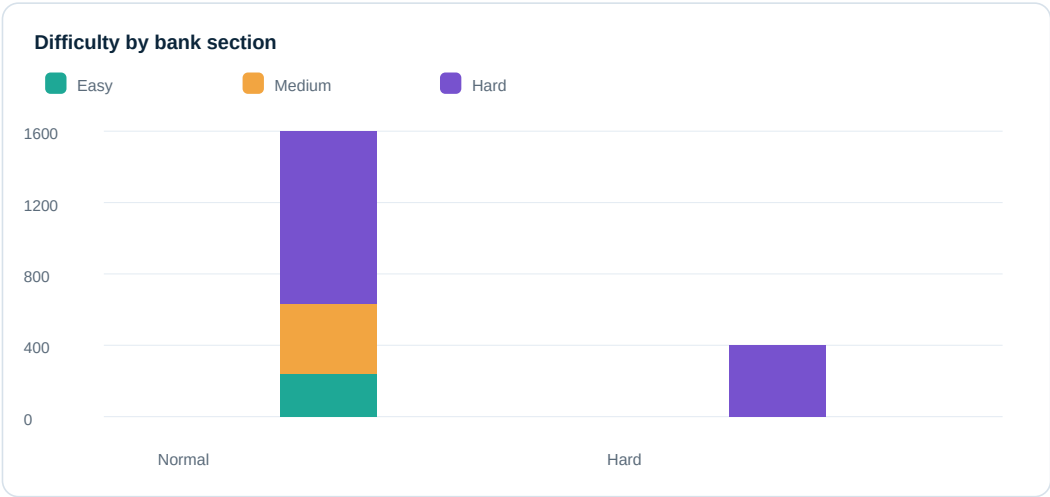

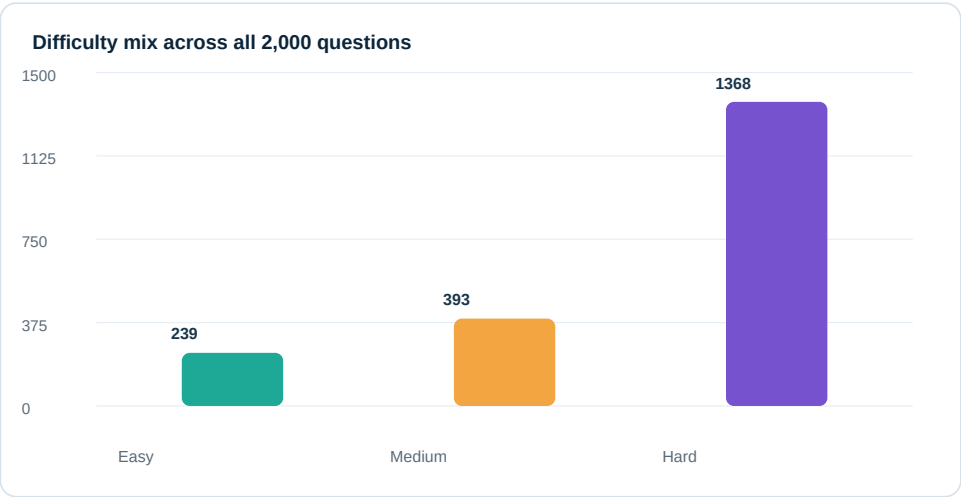

CLO	Official weighting	2,000-bank target	Coverage theme
CLO1	15%	300	Malaysian financial system
CLO2	45%	900	Regulation/KYC/PIDM/AML
CLO3	40%	800	Debt securities/products

Interpretation

This page reports the official assessment weighting as a design target for the full bank. Hard Mode follows the 12 / 36 / 32 question split per 80-question set, matching the 15% / 45% / 40% exam profile exactly.

Result

The updated report now reflects the 2,000-question deployment bank and the official exam benchmark instead of the older 1,600-question report baseline.

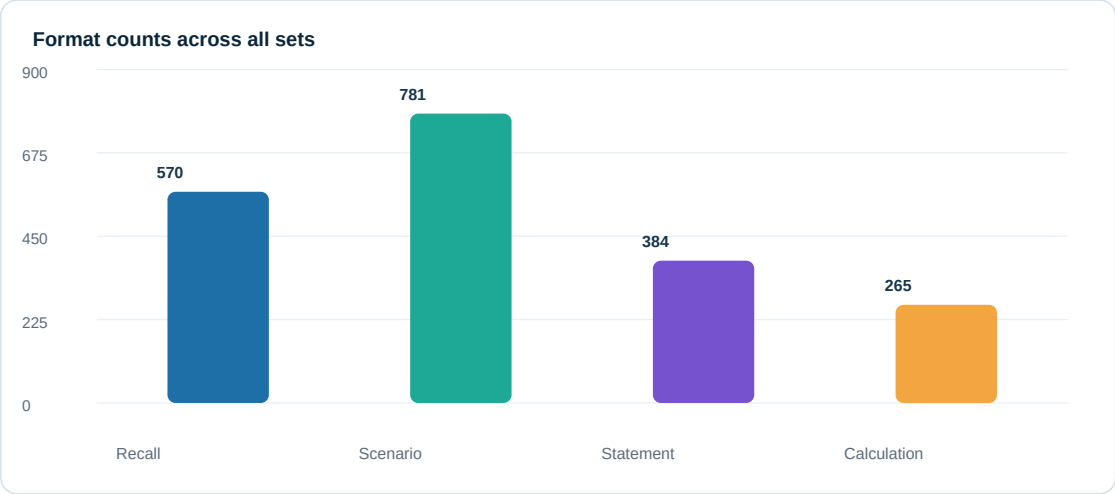

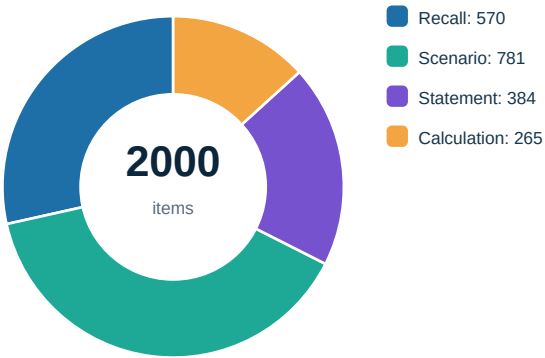

Difficulty	Count	Share
Easy	239	11.9%
Medium	393	19.7%
Hard	1368	68.4%
Hard Mode only	400	100.0% hard

Result

The bank now supports two different study jobs: normal mock practice for breadth and Hard Mode for precision testing. Hard Mode is intentionally more complex and traps-heavy, while the standard bank remains available for full syllabus coverage.

All-bank format mix

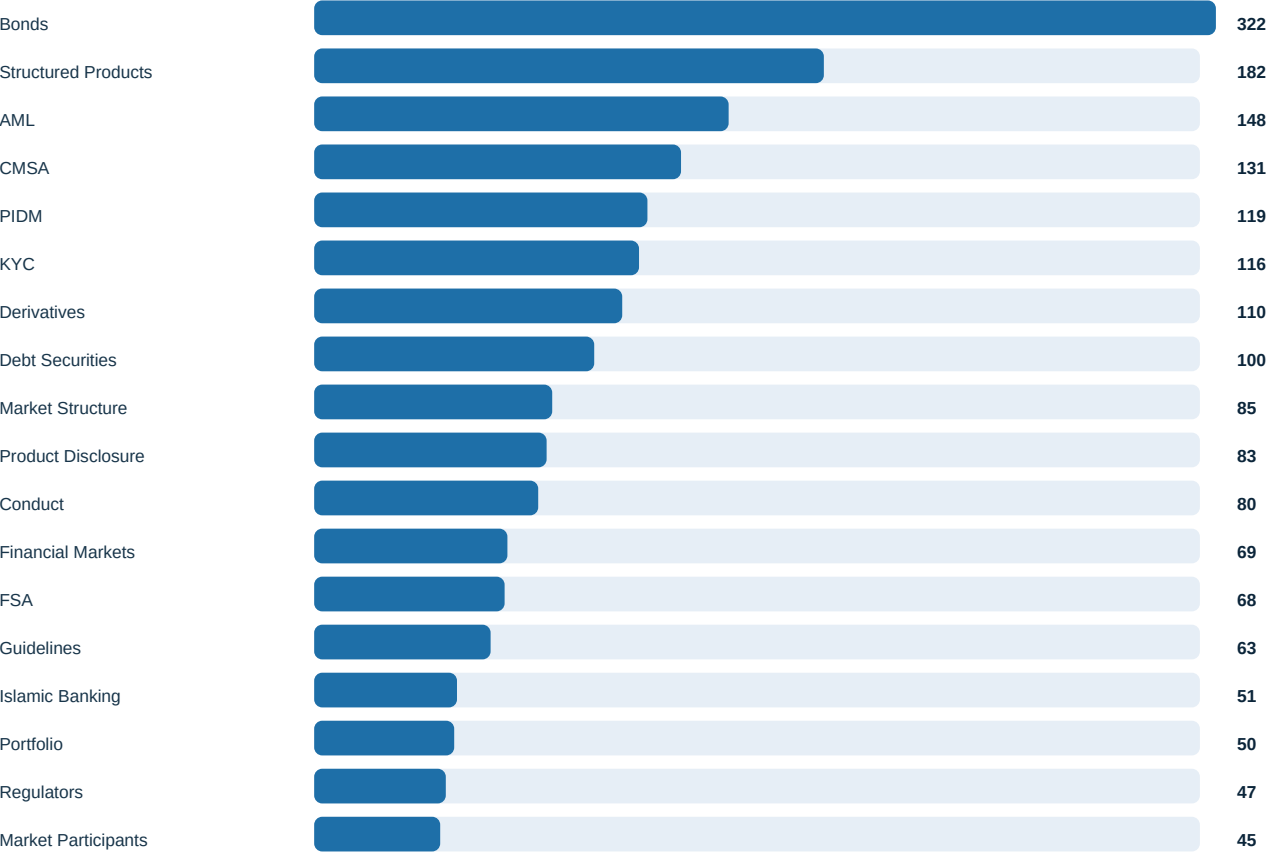

Format	Normal bank	Hard Mode	Total
Recall	570	0	570
Scenario-based	501	280	781
Statement-combination	329	55	384
Calculation	200	65	265

Interpretation

Hard Mode focuses on scenario traps, calculations and statement-combination logic, while the standard bank remains available for broad practice.

Top 18 topics by question count

Topic	Count	Share
Bonds	322	16.1%
Structured Products	182	9.1%
AML	148	7.4%
CMSA	131	6.6%
PIDM	119	5.9%
KYC	116	5.8%
Derivatives	110	5.5%
Debt Securities	100	5.0%
Market Structure	85	4.2%
Product Disclosure	83	4.2%

Readout

The largest coverage areas remain Bonds, Structured Products, AML, CMSA, PIDM and KYC. This is consistent with the heavy regulatory and product-knowledge emphasis of the IPPC syllabus.

Calculation items

265

Normal 200 + Hard 65

Formula present

265/265

Detailed arithmetic shown

Calculation QA item	Count	Status
Formula line	265	Pass
Step 1 marker	265	Pass
Working section	265	Pass
Answer line	265	Pass

What changed in V92

The previous issue where some calculation explanations gave only the answer has been addressed. All 265 calculation items now include a formula and step-by-step working, including the Set 16 bond fair-price item.

Result

Calculation explanation completeness remains 265/265, and all 384 statement-combination items now include statement-by-statement reasoning.

Hard Mode sets

5

Hard 1 to Hard 5

Hard questions

400

80 per hard set

Difficulty

100% Hard

No easy/medium items

Answers

100 each

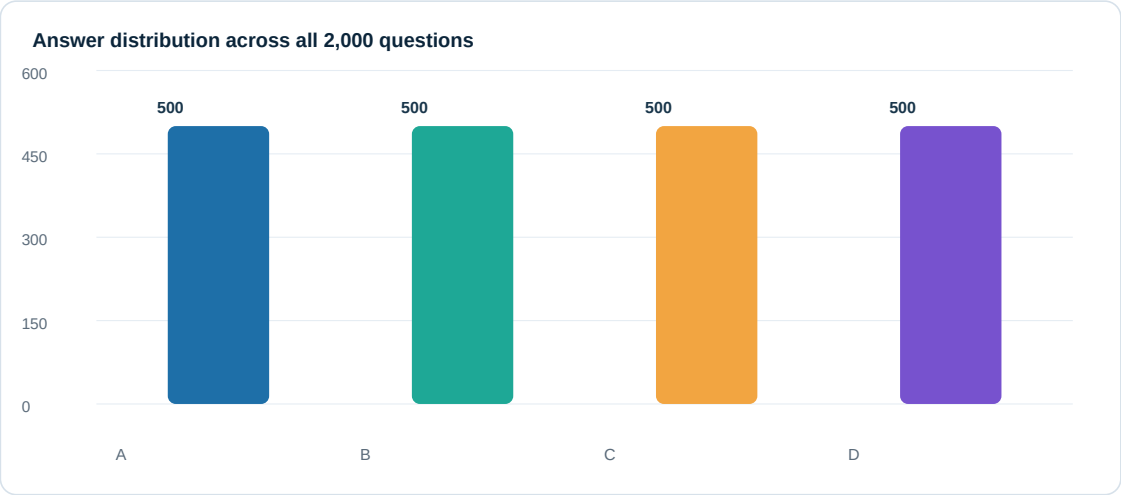

A/B/C/D in Hard Mode

Set	Q	Scenario	Calc	Statement	A-D
Hard 1	80	56	13	11	20 each
Hard 2	80	56	13	11	20 each
Hard 3	80	56	13	11	20 each
Hard 4	80	56	13	11	20 each
Hard 5	80	56	13	11	20 each

Readout

Hard Mode preserves exact set size, exact answer balance and all-hard difficulty. Each hard set contains 56 scenario-based questions, 13 calculations and 11 statement-combination items.

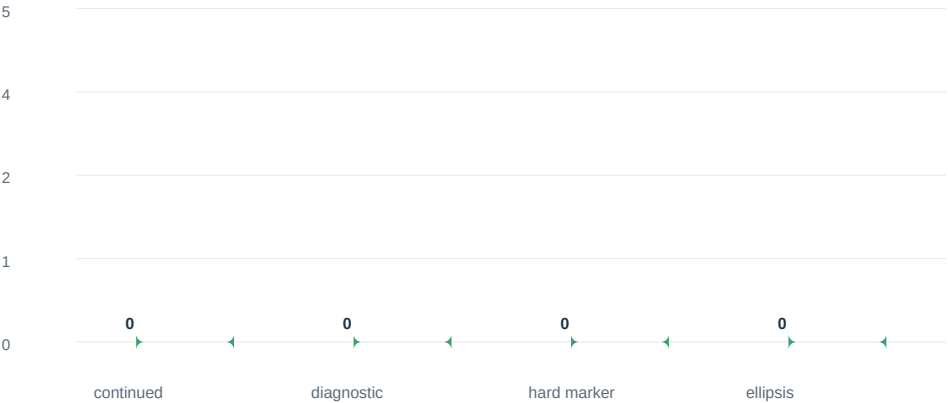

Answer	Normal	Hard	Total	Status
A	400	100	500	Pass
B	400	100	500	Pass
C	400	100	500	Pass
D	400	100	500	Pass

Interpretation

The answer key remains mathematically balanced. This reduces answer-pattern guessing and preserves fairness after adding Hard Mode and rewriting calculation explanations.

Text artifact flags after V97 cleanup

QA check	Result	Status
[continued] markers	0	Pass
This item tests diagnostics	0	Pass
Hard-set marker in stems	0	Pass
Visible ellipsis cutoffs	0	Pass
Calculation formula coverage	265/265	Pass
Calculation step coverage	265/265	Pass

Structural QA check	Result	Status
Duplicate stems	0	Pass
Duplicate Q + options	0	Pass
Hard Mode difficulty check	400 hard	Pass

Result

No learner-facing [continued] markers, diagnostic placeholders, hard-set labels in stems or visible ellipsis cutoffs remain. The page-11 chart now scales dynamically, so a non-zero future finding cannot overflow the slide.

What to use now

- Use the V97 minimum ZIP for GitHub/Vercel deployment.
- The embedded report is now IPPC_Question_Bank_Analytical_Report_V97.pdf.
- The app labels now refer to the V97 Analytical Report.
- The full package contains the audit report and changelog for handover.

Check	Result	Status
Total questions	2,000	Pass
Sets	25 x 80	Pass
Normal bank	1,600	Pass
Hard Mode	400	Pass
Calculations	265	Pass
Calculation steps	265/265	Pass
Answer balance	500 each	Pass
Report references	V97	Pass

Verdict

The report has been updated to reflect the V97 question-diversity pass, full statement-combination reasoning, and the current 2,000-question deployment bank. Use V97 as the current report/package baseline.
